Recommendation letter

I am pleased to write this letter of recommendation for Andreea-Isabel Asimine, who worked as a student intern at Siemens Gamesa from February to June 2024. During her internship, Andreea demonstrated exceptional technical abilities, problem-solving skills, and a strong commitment to delivering high-quality solutions.

One of her most impactful contributions was the design and development of a Mendix-based Team Allocation Application, which replaced an inefficient Excel-based tracking system. She took full ownership of the project, overseeing all stages of development, including domain model design, business logic implementation, data migration, UI development, and deployment. Andreea also played a key role in ensuring the application's successful adoption by providing comprehensive documentation and hands-on training sessions for users.

In addition to her software development work, Andreea actively contributed to the architecture team, assisting with task tracking, feature coordination, and technical discussions related to data strategy. She quickly adapted to new challenges, approached her work with a structured and analytical mindset, and demonstrated a keen ability to collaborate effectively within a professional environment.

What truly sets Andreea apart is her exceptional teamwork and ability to collaborate seamlessly with colleagues. She is an excellent team player who communicates effectively, shares knowledge generously, and thrives in collaborative settings. She consistently fostered a positive and productive work environment, actively engaging with stakeholders, supporting her peers, and ensuring smooth coordination across teams.

Alongside her proactive approach, strong sense of responsibility, and ability to work independently, Andreea consistently took initiative, tackled complex tasks with confidence, and delivered results beyond expectations. Her technical expertise, teamwork, problem-solving, and communication skills make her an asset to any team.

I have no doubt that Andreea will continue to excel in her future academic and professional endeavors. I highly recommend her and would be happy to provide further information if needed.
