Letter of Recommendation for Andreea-Isabel Asimine

To Whom It May Concern,

I am pleased to recommend Andreea, who worked as a student assistant under my supervision from August 1, 2024, to June 30, 2025. During this period, she approached her work with a dependable and thoughtful attitude, and contributed to a number of technical tasks that supported our daily operations.

She was involved in work related to Linux environments, Python scripting, and the automation of routine tasks within our CI/CD pipeline. She also assisted with aspects of software deployment using Ansible and helped manage virtual machines in VMware. Her contributions were helpful in easing some of the team's workload and improving our internal workflows.

In addition to her technical work, Andreea gained experience working within a large organizational setting and participated in Agile-based team projects. She was a collaborative presence in the team—always approachable, friendly, and a pleasure to work with. Her positive attitude and easygoing nature made her a welcome addition to the group.

While still early in her professional development, Andreea showed a good foundation and the ability to grow with experience. I appreciated both her contributions and her collegial spirit, and I am confident she will continue to develop her skills further in future roles.

Sincerely,

Jacob Melin
